

Moon Madness

Become an officially certified lunatic! You are guaranteed to learn something new about our moon! Activities include learning interesting facts about the moon including modeling the moon phases with simple hands-on-activities to make connections.

Bio:

Mary Vaughn has been a teacher for almost thirty years, teaching students of all ages including coaching teachers in Science. Mary is a Solar System Ambassador for the Jet Propulsion Laboratory in Pasadena, CA, selected as inaugural member of the Solar Educator Expedition Crew (SEEC) out of Johnson Space Center, Houston, TX, and is the Student Spaceflight Experiments Program (SSEP) Director for Hillsborough County Schools in Tampa, FL. Through this program students compete to send science experiments to the International Space Station. She considers herself a true space enthusiasts using Earth and Space content to engage our next generation of students!
