

Victoria and Fred Fox

Victoria is the Gifted Resource teacher and Science Coach at Sand Lake Elementary in Orlando and Coach for the First Lego teams

Fred is a mechanical design engineer at Universal Orlando and is head coach for our First Lego teams, and helps out in the classroom robotics lessons.

Robotics in the Classroom - Elementary

Coding, problem solving, programming, and creating all in one class!

Even elementary level students can do this and learn so much about the world around them and how to work with other in a cohesive setting.

We currently run 2 First Lego League teams in our school, and I have turned the materials into classroom lessons as well.

Even students as young as kindergarten can learn the basics of robotics.

Come learn how to incorporate robotics into your class.
